AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application.

LISTING OF CLAIMS

1. (currently amended) A microcontroller, comprising:

a circuit comprising at least one of an analog circuit and a digital circuit wherein

said analog circuit comprises an analog input and an analog output and said

digital circuit comprises a digital input and a digital output;

a wirebond pad;

a processor; and

a switching circuit that selectively connects the circuit at least one of said

analog input, said analog output, said digital input and said digital output to the

wirebond pad under control of the processor.

2. (original) The apparatus according to claim 1, wherein the analog circuit comprises

a configurable analog circuit block.

3. (original) The apparatus according to claim 1, wherein the digital circuit comprises a

configurable digital circuit block.

4. (canceled)

5. (canceled)

6. (canceled)

7. (currently amended) The apparatus according to claim $6 \underline{1}$, wherein the switching circuit

comprises a tristate analog buffer amplifier coupling the analog output to the wirebond pad, and

wherein the analog output is switched by tristate control of the tristate analog buffer amplifier.

8. (currently amended) The apparatus according to claim $\frac{6}{1}$, wherein the switching circuit

comprises an analog buffer amplifier in series with an analog switch coupling the analog output to

the wirebond pad, and wherein the analog output is switched by the analog switch.

9. (currently amended) The apparatus according to claim $\frac{6}{1}$, wherein the switching circuit

comprises an analog switch coupling the analog output to the wirebond pad, and wherein the

analog output is switched by the analog switch.

10. (currently amended) The apparatus according to claim 6 1, wherein the switching circuit

comprises an analog switch coupling the analog input to the wirebond pad, and wherein the

analog input is switched by the analog switch.

Serial No.: 09/893,050

11. (currently amended) The apparatus according to claim 6 1, wherein the switching circuit

comprises a tristate analog buffer amplifier coupling the analog input to the wirebond pad, and

wherein the analog input is switched by tristate control of the tristate analog buffer amplifier.

12. (currently amended) The apparatus according to claim $\frac{6}{1}$, wherein the switching circuit

comprises a tristate logic gate coupling the digital output to the wirebond pad, and wherein the

digital output is switched by tristate control of the tristate logic gate.

13. (original) The apparatus according to claim 12, wherein the tristate logic gate

comprises an inverter.

14. (original) The apparatus according to claim 12, wherein the tristate logic gate

comprises a buffer.

15. (currently amended) The apparatus according to claim 6 1, wherein the switching circuit

comprises a multiple input logic gate coupling the digital output to the wirebond pad, and

wherein the digital output is switched by an input to the multiple input logic gate.

16. (original) The apparatus according to claim 15, wherein the multiple input logic gate

comprises a NAND gate.

6

(currently amended) The apparatus according to claim 6 1, wherein the switching circuit 17.

comprises a tristate logic gate coupling the digital input to the wire bond pad, and wherein the

digital input is switched by tristate control of the tristate logic gate.

(original) The apparatus according to claim 17, wherein the tristate logic gate 18.

comprises an inverter.

(original) The apparatus according to claim 17, wherein the tristate logic gate 19.

comprises a buffer.

(currently amended) The apparatus according to claim 6 1, wherein the switching circuit 20.

comprises a multiple input logic gate coupling the digital output to the wirebond pad, and

wherein the digital input is switched by an input to the multiple input logic gate.

21. (original) The apparatus according to claim 20, wherein the multiple input logic gate

comprises a NAND gate.

22. (currently amended) The apparatus according to claim 6 1, wherein the switching circuit

comprises an isolation resistor isolating the wirebond pad from one of a digital input, an analog

7

input and analog output.
